

Looking for an alternative to Chlorine Have a chemical free Swimming Pool and Spa

Tired of using chemicals? Allergic to chlorine? Tired of that skin rash from your swimming pool and spa or do you just want to live without all those chemicals you are subjected to daily? Eliminate that damaging salt, chlorine, bromine and other chemical products and have a clean and clear pool and spa.

Technology exists that makes pools more enjoyable and easier to upkeep. It is called Electronic water purification, a system that automatically purifies, sanitizes and eliminates algae in your swimming pool, spa, hot tub or fountain. The system is environmentally safe and is a non-chemical alternative using a technology developed for NASA in the 1960's. It was an electrolytic silver ionizer that would purify the drinking water for use on the Apollo Space Flights.

Copper and silver have been used for centuries to sanitize water. Copper is a well-known algacide and silver is a powerful bactericide. Silver is used in medications for treatment on burn patients to prevent infections and to make bacteria free cosmetics. Copper is needed in our diet. It is one of those recommended minimum daily requirements. The EPA standard for our drinking water is 1.3 PPM of copper. Less than one-fourth of this amount is used to purify your pool.

The system utilizes a low voltage DC current that passes thru a copper and silver alloy anode. As the water passes thru the sealed chamber, metallic copper and silver ions are generated that purify the water. The microscopic action of the ions first destroys the algae and bacteria and then these particles are collected together and are removed by the filter. The system actually saves you money by reduced electricity costs; no longer do you buy chlorine, bromine, stabilizers, algacides and clarifiers. And these savings continue as long as you own your pool.

Normal water testing and adjustments are all that is needed to insure a superior water quality. Water balance is easy to maintain since the Ion system is PH neutral. Occasionally, your swimming pool service company will need to oxidize the water to help break down excess organic matter from bad weather, rain and wind, from suntan oils and sun blocks.

A Kool Pool Service provides professional and reliable swimming pool service to the Coachella Valley, Palm Desert, Bermuda Dunes, La Quinta and Indian Wells. We have a reputation of maintaining long lasting relationships with all our customers. A Kool Pool specializes in alternatives to help maintain safe pool water chemistry without dangerous chemicals. To get more information on pool services in Coachella Valley and

surrounding areas, visit www.akoolpool.biz, Email us at akoolpoolserv@aol.com or call 760-773-0135.
